FICTITIOUS EXAMPLE D1 – for testing only

[0010] A valve assembly is disclosed comprising a housing (2) and a closure member (4) that is resiliently biased against a valve seat (6). The term “closure member” denotes any element comprising a sealing surface.

[0011] In a preferred embodiment, the closure member (4) is made of a fluoropolymer and the housing (2) is made of stainless steel. The

spring (8) acts on the closure member (4) with a force of between 5 N and 20 N.

[0012] The valve seat (6) is integrally formed with the housing (2).

CLAIMS

1. A valve assembly comprising a housing (2) and a closure member (4).
2. The valve assembly according to claim 1, wherein the closure member (4) is made of a fluoropolymer.
